

GAURAV KUMAR

Frontend Developer | Full Stack Developer

+91-748-1812-280 | gauravkumarsharma311@gmail.com | linkedin.com/in/gauravkumar311 | github.com/GauravBaba3
Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Frontend and Full Stack Developer with a background in building data-driven web interfaces and optimizing backend performance. Experienced in creating interactive dashboards, implementing structured data storage, and collaborating across the full development stack. Demonstrated ability to improve page load performance by 30% and server response time by 15% through frontend and backend optimization. Proficient in Python-based backend services, SQL databases, and visual data presentation.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), Interactive Dashboards, Power BI Embedded, Matplotlib, Seaborn, Excel Dashboards

Backend & Databases: Python, MySQL, SQL (Joins, Aggregations, Window Functions), Oracle SQL Developer, Query Optimization, ETL Pipelines

Data & Analytics: Pandas, NumPy, Scikit-learn, EDA, Feature Engineering, Statistical Analysis, Google BigQuery, Google Analytics

Tools & Cloud: Git, GitHub, VS Code, Google Cloud Platform, Jupyter Notebook

WORK EXPERIENCE

Frontend & Data Visualization Developer – Trainee | Qspiders

Aug 2024 – Present Bengaluru, Karnataka

- **improving stakeholder reporting efficiency by 40%.** Designed and built interactive KPI dashboards in Power BI,
- Created data visualization components using Matplotlib and Seaborn to present analytical trends clearly and intuitively to stakeholders.
- Built automated reporting pipelines using Python, eliminating manual data presentation overhead across sales and HR departments.
- Developed SQL queries with joins and window functions, contributing to cleaner, faster data rendering in reporting interfaces.
- Cleaned and validated 10,000+ record datasets ensuring consistent, reliable data displayed on front-facing dashboards.

Web Development Intern (Frontend + Backend) | NSIC Technical Services Centre

Feb 2025 – Mar 2025 Chennai, Tamil Nadu

- **achieving a 30% improvement in page load times.** Analyzed user interaction data on the web platform to identify UX and performance bottlenecks,
- **reducing server response time by 15%.** Optimized MySQL backend queries and database handling,
- Implemented structured data storage best practices to improve data retrieval performance for frontend components.
- Collaborated with cross-functional teams on frontend-backend integration using Git for version control.

PROJECTS

Employee Attrition Dashboard | Python, Pandas, Seaborn, Matplotlib, Power BI, Excel

- Built full end-to-end interactive Power BI dashboards visualizing attrition trends across departments, job roles, and tenure for executive stakeholders.
- Designed data storytelling visuals communicating that employees with 1–2 year tenure and low satisfaction had 40% higher attrition.
- Executed complete data cleaning pipeline to ensure 1,400+ records were consistent and dashboard-ready.

Road Crash Severity Prediction – ML Pipeline | Python, Scikit-learn, Pandas, Random Forest

- Built end-to-end ML classification pipeline and visualized feature importance insights for 5,000+ traffic incident records.
- Produced clear visual outputs of model performance metrics (precision, recall, F1-score, confusion matrix) for reporting.

GITHUB PORTFOLIO

github.com/GauravBaba3 — 10+ repositories covering end-to-end ML workflows, SQL analysis, EDA pipelines, and interactive Power BI dashboard projects.

CERTIFICATIONS

- Tata – Data Visualisation Job Simulation (Forage) | Deloitte Australia – Data Analytics Job Simulation (Forage)
- Google Cloud – Set Up App Dev Environment on Google Cloud
- Introduction to Generative AI – Google | AI For India 2.0 – NSDC | Python Programming – GUVI

EDUCATION

Bachelor of Engineering in Computer Science and Engineering | CGPA: 7.57/10.0

Anna University, Perambalur, India | July 2021 – July 2025
